

A LEAN Manufacturing Company

Efficiency at Every Level Means Value to our Customers

Since we started our journey to become a LEAN organization, EIS has embraced a company-wide philosophy of continuous improvement and pursued the goal of eradicating waste to increase value to our customers. By Value Stream Mapping every process from quoting to delivery, EIS has virtually eliminated all “work-in-process”; increasing our agility, flexibility and responsiveness.

What a LEAN EIS means to our customers:

- Response to Request for Quote in 24 to 48 hours
- “Industry Best” lead times: 1 to 3 weeks
- On-time shipments: 98% success rate
- Value, efficiency, responsiveness at every level

EIS – Your Manufacturing Partner

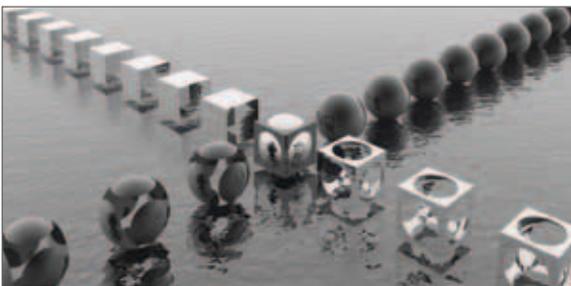

LEAN on EIS

Value, efficiency & responsiveness are qualities that are demanded by the consumer in today's marketplace. As a LEAN organization, EIS is ideally suited for the role of "manufacturing partner" to our customers. The spirit of partnership we offer is a testament to our success with the LEAN philosophy and evident in the long-term relationships and repeat business we enjoy.

The EIS Collaborative Role:

Manufacturing Agility: The result of the efficiency we've created through the Pull System; fast turnaround and flexibility with scheduled releases or design changes replicate an "inventory management" system while eliminating the long-term commitment and capital investment required by a stocking program.

Strategic Alliances: We're proud of the partnerships we share with our customers and suppliers – ISO customer surveys consistently describe EIS as providing an "elite" level of customer service. We go above and beyond to help our customers pursue, service and manage business.

Consistency: In all aspects of our products and service, you can expect superior quality, solution based-collaborative design, on-time delivery and organizational responsiveness EVERY TIME.

What you want, when you need it.

Contact EIS today to experience the benefit of working with a LEAN manufacturer. For more information on LEAN, visit the "Our Process" section of www.eiswire.com or arrange to tour our facility and see first hand how the EIS LEAN Operating System distinguishes us from traditional manufacturers and adds value to your business.
